

SWIFT

SYMPTOM MONITORING WITH
FEEDBACK TRIAL (SWIFT)

January Newsletter 2025

About SWIFT

SWIFT aims to see if people who are managed with hemodialysis for kidney failure can benefit from systematic monitoring of their symptoms (like tiredness, itching, pain) and if feedback of these symptoms to their nurses and kidney doctors improves patients' overall quality of life. This trial is run by University of Sydney in collaboration with ANZDATA.

Happy

New Year

from the SWIFT team! We are grateful for your collaboration over the past year and look forward to continuing our partnership in 2025.

Welcome Onboard

- Thursday Island Satellite Unit, QLD
- Bamaga Satellite Dialysis Centre, QLD
- Wonthaggi Hospital, VIC
- Sale Hospital, VIC
- Caulfield Hospital, VIC
- Sandringham Hospital, VIC

Dana Alhuzaimi, SWIFT Research Coordinator with Clare Rushman and Christie McKellar at Wonthaggi Hospital Dialysis Unit, Victoria

SWIFT at ACTA

Professor Rachael Morton, SWIFT PI at ACTA, Melbourne, December 2024.

SWIFT was presented at the Australian Clinical Trials Alliance (ACTA) Registries Symposium in December. The poster was presented by Dr Pascale Dettwiler from the Australian Teletrial program. Titled "Working Together to Increase Equity and Access – The SWIFT study and ATP – South Australia."
