

# SWIFT

SYMPTOM MONITORING WITH  
FEEDBACK TRIAL (SWIFT)

May Newsletter 2026

## About SWIFT

SWIFT aims to see if adults who are managed with hemodialysis for kidney failure can benefit from systematic monitoring of their symptoms (like tiredness, itching, pain) and if feedback of these symptoms to their nurses and kidney doctors improves patients' overall quality of life. This trial is run by University of Sydney in collaboration with ANZDATA.

## SWIFT in New Zealand

Inspiring and Enabling:  
Diversity in Action  
- Every Voice, Every Patient

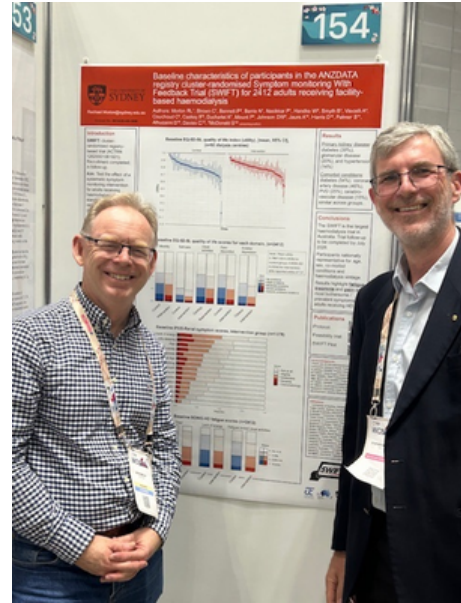

17-19 June 2026

Te Pae Christchurch Convention Centre

Prof. Paul Bennett will present "Every Voice and Every Patient: Symptom Burden and Quality of Life Among Adults Receiving Haemodialysis in the Australian SWIFT Study" at the 2026 RSA Conference in Christchurch, New Zealand

## SWIFT in Japan

(L-R) SWIFT Clinical Leads: Prof Peter Mount & Prof Stephen MacDonald

Baseline characteristics, symptom scores and baseline quality of life scores of 2412 SWIFT participants, were presented by Prof. Stephen McDonald AM, Clinical lead, at the World Congress of Nephrology (WCN 26) in Yokohama, Japan, March 2026.

**Final results are expected  
by end of 2026**
